'Contractors Seek Recall'—BACCUS

COUNCIL IN SQUALLY SESSION

Commissioner Hurls Charge During Row Over Appointment

\$25,000 to Be Appropriated for Rush Work on Quay Wall

Charges that certain contractors of the city were behind the recall fight to be made against him, and that it was they who were seeking the appointment of M. R. Miller to the position of consulting engineer to the city, were made by Commissioner W. J. Baccus at the council meeting today, following the action of the three new members of the body in giving final passage to an ordinance empowering Mayor Davis to enter into a year's contract at \$900 a month with Miller.

Baccus' charges came at the end of an exceedingly squally meeting, in which Miller was the center of the fight. Miller had been called before the council to make answer to the charges made by Baccus regardless of his qualifications as an engineer.

After the meeting adjourned Baccus said that his recall was desired by the contractors in order that they might be given a patented paving material, may be used on the city's streets in the future. Baccus has in the past opposed the use of this paving material because there is but one firm in the city, the Hutchinson firm, which can bid on contract work in which it could be used.

"My knowledge of the criticism that can be leveled at me by Mr. Baccus has been taken from the press. No written charges have been made so I made my answer on what I have read in the newspapers."

READS HIS STATEMENT.

Miller then read the following statement:

"To the Honorable City Council,

"City of Oakland. You have summoned me to appear before you to reply to a certain charge made by Commissioner Baccus relative to the work now in progress at the Twelfth street dam."

"Ordinarily I should have ignored a criticism so utterly trifling and unimportant in purpose. Honest criticism made in good faith by a qualified person may be answered with some degree of dignity, but such a criticism as is made against me is mere chaff and is not designed solely to deceive the council."

"I have lived in Oakland for twenty-seven years and am quite willing to let my past record speak for me in private. My thoroughly investigated and unbiased Baccus should be willing as a public servant to have his official acts investigated. He should encourage such proceedings as will be of service to the city. I am sure that the attempt to block it in during all these years I have practiced my chosen profession, including five years service with the municipal engineers and superintendents of streets, upon which I have served the city in an engineering capacity, harbor affairs, water supply and various other capacities. My professional record in California and throughout the country will be available without any investigation. Baccus cares to make

"As superintendent of streets my work in Oakland should especially interest him. I have built many important demonstrations of streets, mostly built in good condition today after sixteen or eighteen years' service, with practically no cost for maintenance (see my report for 1914). In contrast, with miles of paved streets, but with little use for five years under his jurisdiction which today is in a most deplorable condition and which costs a large expense for maintenance, solely of large expense for maintenance, due to reason of improper construction."

FACTS HE RELATES.

"The facts of the Twelfth street dam are these: About thirty days ago in putting that the new administration would be officially in a position after July 1 to consider all such matters, I looked into the work and found it probably as duties to which I expected to be assigned, and I found that the paving contract involved a most flagrant and unnecessary waste of about \$20,000 out of the \$100,000 paid for the paving. The paving for a base block paved men on a crushed rock foundation and for raising the grade some fifteen inches. The south half of the street need not have been paved and could have been in a fairly good condition and could have considerable future service. If the grade had been properly adjusted, the north half of the street need not have been torn up and repaired, thus reducing

ADRIATIC CITIES OF ITALY ARE SHELLED BY AUSTRIAN FLEET

Tremendous Operations on Tyrol Frontier and in Poland Waging

SIR EDWARD QUASHES NOTE

ROME, via Paris, July 27, 4:30 p. m.—Certain light Austrian cruisers and four Austrian torpedo boat destroyers at dawn today bombarded several points on the railroad which runs along the shore of the Adriatic, between Senigallia, sixteen miles west northwest of Ancona and Pesaro. At the same time several shells were thrown into the villages of Fano and Senigallia.

At the same time our two hydro-aeroplanes dropped bombs on Ancona. Neither bombardment killed or wounded any one and the damage inflicted was slight.

Terrific Losses in Tyrol

By Associated Press.

GENEVA, July 26, via Paris, July 27, 12:10 a. m.—The Tribune prints the following regarding operations in the Italian war theater:

"The Austrians fight with utter contempt for death and the losses on both sides are frightful, but those of the Austrians appear heavier, the Italian artillery mowing them down in masses."

"On Monte Nero the Italians have carried several portions of the enemy's positions.

"At Podgora the Italians repulsed all Austrian attacks notwithstanding the extreme violence with which they were delivered."

Britain Withdraws Note

By Associated Press.

WASHINGTON, July 27.—Sir Edward Grey cabled Secretary Lansing today that the British government has in preparation another note to the United States on the orders in council and asked that the note delivered yesterday be withheld from publication, pending receipt of the new communication. Therefore, yesterday's note will not be published tomorrow morning, as had been planned.

The nature of the note was not intimated in Sir Edward's cable, but state department officials assume it is supplemental. The development will further delay dispatch of the American note to Great Britain on the same subject. The message said the new note would be here in a week.

In official quarters the development was regarded as highly significant. The belief prevailed that the last American note to Germany with its references to the freedom of the seas may have influenced Great Britain to place herself on record as willing to take under consideration any new suggestions by the United States. Sir Edward Grey's recent statement was taken to mean that a new situation had arisen, or that some new proposals were about to be made to alleviate the effects of the order in council.

"As superintendent of streets my work in Oakland should especially interest me. The demonstration of streets, mostly built in good condition today after sixteen or eighteen years' service, with practically no cost for maintenance (see my report for 1914). In contrast, with miles of paved streets, but with little use for five years under his jurisdiction which today is in a most deplorable condition and which costs a large expense for maintenance, solely of large expense for maintenance, due to reason of improper construction."

FACTS HE RELATES.

WHY SHOULD YOU BE SHABBY?

When All the Other Fellows Are Buying Clothes on Credit?

You'll be as welcome at CHERBY'S cool, spacious, attractive Clothing Shop as they are, and there are any number of Classy Suits, with the Style "façade" in their lines, ready for you.

This warm weather is irresistible—ideal for vacationing—but days cost money, and it's well to enjoy yourself in a well-fitting, fine-looking Summer Suit.

At CHERBY'S cordial invitation to come and have your pick of the season's cleverest models, for the payment of just a little down and the rest in convenient installments later, is welcomed joyfully by hundreds of men this week.

In Oakland, the men's clothing is handled at 525 Thirteenth street, while at 513 Thirteenth street you'll find ladies' apparel. In San Francisco go to 1065 Market street, or to 2400 Mission street. If it is more convenient, we can have a big establishment there as well, and men's and women's apparel is handled at both stores.—Advertisement.

FINDS THIEF IN ACT OF STEALING PIPE

Mrs. William Segman, 740 Sixty-first street, visited a vacant house belonging to her at 411 Thirty-sixth street to see about some repairs, and found a man in the basement busily cutting away the lead pipe plumbing fixtures. When she inquired his business, the man backed toward the door, saying he was a plumber. He fled when she questioned him further. The police were notified.

Burglars entered the home of E. Rogers, 821 Cole street, and ransacked the place last night. The family is away in the country, and the loss has not been ascertained.

A gold watch, valued at \$35, was given by a two-months-old child to a patron who entered the store of Choy Quong, 1822 San Pablo avenue. The woman who was given the watch hastened from the store, but it was not discovered until later. The little Chinese boy had been given the timepiece for a few minutes to keep him quiet.

The home of Hohn Comini, 9427 B street, was entered last night by a burglar, who stole a gold watch and a fancy bracelet.

PRESIDENT IS GUEST OF DAUGHTER AT TEA

CORNELL, N. H., July 27.—Miss Margaret Wilson, President Wilson's daughter, sent out invitations to a tea to be given at Harlakenden House on Wednesday. President Wilson will be present.

Rumania is very rich in forests, which cover over 5,000,000 acres, more than one-sixth of the country, half of which belongs to the state.

NERO DANCE STARS MAY GET COLD FEET

Hot Road Roller Is Suggested for Trouble

Cold feet and "blame" dances!

Never, when there's a hot road-roller on the University of California campus, from one end to the other, will the cold feet mean stiff feet and stiff feet mean stiff class. Dancers, S. C. class, dancers, ear a "blamer" for Nero. This is the edit of the fair dancers of the Players' club.

For the first time in history a hot road-roller just invaded the classic class of the Girls' Club, and unless the cold feet are considered too great, and bare feet as a consequence, forced to dance on cold cement! At least, the hot road-roller, so far as suggestions have gone, seems the only practical way for warming the cold white stage.

It's all because they're going to hold barefoot dancing—and not on rugs, leaving barefoot on meadows or the board floor. A wooden stage is out of the question or a certain stage, another!

The fair dancers, "Nero," will be present at the first meeting of the Players' Club tonight, protected. They wanted sandals or a warm stage. This especially applied to Dorothy Smoller, the polo dancer. Cold stages meant cold feet—and cold feet meant stiff ones, complained the dancers. And stiff feet meant stiff dancing—and Nero would be a "blamer."

Hurried conferences of stage hands preceded the road roller. If permitted tonight, the workmen will run it over the stage before the dance—and do away with the cold feet!

Several notable effects, including "The Burning of Home" in red fire and electrical illusions, are part of the massive production of tonight. Margaret Anglin and Livingston Platt visited the rehearsals last night and declared the production creditable in every way.

BERKELEY, July 27.—A red flame will shoot up from the top of the Sather Campanile tonight to announce to the bay cities the hour of the production of "The Firebird" at the Nero in the Greek Theater of the University of California. Later, when the play is near its close, the fire will again burn in the bell tower and new ones will be lighted in the electrical rooms of the "comedy joint" on the rim of the Bay and in front of East Hall. To the bay cities it will appear as if Berkeley is burning but those within the theater will be impressed with the realism of burning Rome.

The production will be personally supervised by Reginald Travers, who has directed the two score members of the Brooklyn Presbyterian church, Fifth avenue and East Fourteenth street, was accepted by the Oakland Presbytery at a meeting yesterday in the church.

Appreciation of his long services was expressed by his congregation, represented by I. W. Helmke, Mrs. M. J. Hamilton and H. O. Abbott.

Rev. Sanborne will seek opportunities in other fields, saying he has brought the work to a point where it can be carried on by another. He has not announced where his next pulpit will be.

Rev. W. H. Oxtoby, D. D., of San Anselmo will occupy Rev. Sanborne's pulpit Sunday.

MISS DOROTHY SMOLLER

REV. SANBORNE LEAVES BROOKLYN MINISTRY

The resignation of Rev. H. K. Sanborne for the last ten years pastor of the Brooklyn Presbyterian church, Fifth avenue and East Fourteenth street, was accepted by the Oakland Presbytery at a meeting yesterday in the church.

Appreciation of his long services was expressed by his congregation, represented by I. W. Helmke, Mrs. M. J. Hamilton and H. O. Abbott.

Rev. Sanborne will seek opportunities in other fields, saying he has brought the work to a point where it can be carried on by another. He has not announced where his next pulpit will be.

Rev. W. H. Oxtoby, D. D., of San Anselmo will occupy Rev. Sanborne's pulpit Sunday.

MISS ANGLIN AIDS

Particularly fortunate is the Players' Club on this occasion in the general absence of Mrs. Anna E. Anglin, who, as an honorary member of the club, offered for the production anything which she may lend. The electric lighting equipment carried by Miss Anglin and Misses Poppea will be used.

The title role is to be interpreted by Miss Helen King, the mother of Nero and Poppea will be played by Miss Anglin. She is to come to the stage and for her appearances in leading roles in the English Club productions. Francis P. Buckley will play Otto Poppea's husband and William S. Rainey will have the title role of Nero. Other English parts will appear Mrs. Emily Parmenter, Miles Hinde, Clough, Miss Frances McCloskey and Thornton Wilson.

F. D. ADAMS, SHERIFF'S BOOKKEEPER, RESIGNS

Frank D. Adams, bookkeeper at the sheriff's office for the last fourteen years, has resigned his position and Sheriff Barnes has appointed W. W. Crane, former judge and clerk in the county clerk's office, to succeed him. The change becomes effective on August 1, when Adams will leave for Canada.

Adams is leaving Oakland to take up his permanent residence in Quebec where his son, Leland D. Adams, is president and general manager of the Western Mining Company, controlling several valuable copper mines.

HOLLAND FEARS WAR

RICHMOND, July 27.—That Holland is raising an army of a million men and fortifying its important centers, in fear of war with Germany, is told by Mrs. J. M. McLean, 214 Macdonald avenue, from Mrs. Margaret Meyers, a former Oakland girl, who two years ago married a wealthy Hollander and is now living in De Bilt, Utrecht, in Southern Holland.

No Longer Necessary.

It is no longer necessary to say that Colonel Roosevelt delivers his various speeches with vigor.—Stockton Mail.

WOMAN SUBPENAED MOTHER

When the contested divorce suit between Frank B. Happy and his wife, Margaret Ann, is heard again in the Superior Court, Mrs. Happy's mother, whom she has not seen for forty years, will be one of the witnesses. Mrs. Happy has subpoenaed her mother.

MILLER APPOINTMENT AGAIN STIRS COUNCIL

Baccus Declares Contractors Are Backing Efforts to Recall Him

(Continued From Page 1)

portion of the deck being from 25 to 30 feet, and from the wall," continued Miller.

"Don't you believe it?" Baccus retorted. "I am taking notes."

"Well, I am in favor of Mr. Miller's appointment," Mr. Jackson said. "For the time I sent him, if appointed, to be assigned to the immediate investigation of that nuisance we have in West Oakland. There the railroad companies seek to restrain Pending Judge James T. Trout and all the departments of the superior court from interfering further in their litigation with the city in connection with the joint operation of the outer Market-street tracks. At present a writ of execution granted by Judge Trout, preventing the operation of the tracks, remains in effect. The municipal law to remove the exposition and California-street cars, remains intact this morning with the entire outer street, and with Attorneys William M. Cannon and William M. Abbott, representing the United Railroads, and Special Counsel Matt L. Sullivan and City Attorney L. H. Clay.

"The council then, by the same vote, gave first and second reading to an ordinance appropriating \$3000, or as much of that sum as is necessary, for the placing of angles in West Oakland.

At this point Miller took his map to Mayor Davis and explained the San Francisco waterfront to him. The two-pointed argument was occasioned by the statement of Baccus that Miller was one of the most responsible for the placing of angles in West Oakland.

Commissioner Jackson seconded the motion, and Mayor Davis, Edwards and Jackson voted no, and Commissioner Baccus voted yes, and Commissioner Anderson was excused from the meeting.

It was through the suggestion of this commission that the quaywall plans as they stand today were adopted. After Miller had finished talking to the mayor, Baccus shifted the investigation, saying:

"Mr. Miller, how long will it take you to go through my office and make recommendation and changes?"

"I am sure I can't say. I think there is a lot of work there, though."

This occasioned much laughter from the members of the commission, together with the placing of angles in West Oakland.

"DO IT NOW."

"I will say this, though," Miller continued. "I want Mr. Baccus to get a square deal. I have been told he thinks all this is being done to lend weight to the recall against him. I think if I receive this position it would be wise to let his office alone after the election."

"Don't you worry about me," Baccus interposed; "I have no objection to the investigation of my office. In fact, I wish you would do so immediately."

The answer was given at this point, when Baccus turned to Commissioner Anderson and asked him what he thought of the angles in the wall.

"I think that if a ship were tied up there, its decks would be far away from the wall," Anderson replied.

"No," said Miller, "the curved lines of a ship would cause it to fit in. As a matter of fact, it could be moored in better advantage on account of these angles."

"I am sure," said Baccus, "I want to have a public hearing on the temporary injunction.

"Plants and specifications were adopted for paving and flooring behind the quay wall and around the new warehouse and bids were called for."

Commissioner Harry S. Anderson filed a report with the City Council showing that there is a balance available in the waterfront development fund of \$1650. He pointed out that there is in the hands of the county clerk the sum of \$66,748 in escrow, placed there by order of the superior court, which will be returned to the city provided the higher court sustains the judgment of the superior court in the matter of the suit of the Merritt Hospital Association vs. the City of Oakland and the Kendall Lumber Company vs. the City of Oakland.

"I will not say as to that," answered Miller. "I think it would be opposed to the kind of asphalt work that has been done on several streets here. For instance, Grove street."

"Don't blame me for that. That work was done under another man. Do you know any more streets, Mr. Miller?"

"I understand," Miller responded, "that the same engineer had charge of this work at the time these pavements were made."

"No," answered Baccus, "that work was done under Commissioner Turner."

Mayor Davis interposed at this point to inquire what the necessity was for the placing of angles for the quay wall. Miller explained this to the Mayor, after which the contest between the engineer and Baccus was resumed.

"Are you interested in the bitumen mine in California," Baccus asked.

"No, sir; not directly or indirectly," Miller answered. "Never have been."

"Aren't you interested in a bitumen mine in Santa Barbara county?" insisted Baccus.

"You have been misinformed," answered Miller.

"If you investigate my department, you would not recommend a change in the street improvement specification so that a patented pavement could be used," Baccus asked.

"I would not," Miller answered. "Now, tell the truth," Baccus said. "Wouldn't you try to get bituminous streets here?"

"Yes, I can," answered Commissioner Anderson.

"I think the matter should be put over to the city council, in which he charged that the fixing of the grade on them had been found on the beach proving conclusively that the refuse was from the Oakland garbage boats. Commissioner Baccus explained that the city employs an inspector to go out with the garbage boat to see that the refuse is dumped beyond the twenty-mile line from the heads. This is in accordance with state law. "I think it might be a good plan to change inspectors on a white, to white, basis," said Baccus.

"I would really seem that the garbage would become soaked enough to sink if the boats really dumped twenty miles from the heads."

The matter was referred to Commissioner Anderson.

J. H. McDonald filed a letter with the city council today, in which he charged that the fixing of the grade on the extension of Broadway has been made to conform to the grades of the Oakland and Antioch railroad instead of having the railroad conform to the city grades. The commissioners agreed to visit the district tomorrow morning at 9 o'clock to inspect the grade as planned.

ANDERSON'S REPORT.

Commissioner Anderson filed the following report, showing that the revenue from the waterfront has increased \$16,555 over the previous year:

The Council of the City of Oakland, California, herewith present a report of the revenue and business for the fiscal year commencing July 1, 1914, and ending June 30, 1915, compiled by the city wharfinger.

This report is in detail and shows an increase in the time mentioned of \$16,555. Respectfully submitted.

JOHN H. ANDERSON,

Commissioner of Public Works.

Comparative statement of revenue from city wharves for the fiscal years ending June 30, 1914, and June 30, 1915:

July 1, 1912 to June 30, 1914—Dockage, \$482,500. rents, \$2,500,000; wharfage, \$136,100; water, \$41,45; rents, \$782. Total, \$14,227.50.

July 1, 1914, to June 30, 1915—Dockage, \$171,200. rents, \$4,650,000; wharfage, \$2,500; water, \$51,100; rents, \$752,50. Total, \$24,451. Increase, \$10,167.65.

Movement or cargo over city wharves for the fiscal year July 1, 1914, to June 30, 1915—Merchandise, produce, coal, oil, etc., 181,355 tons; lumber, \$2,875,000; feed, etc., 10,167.

Classification of goods arriving during the year, July 1, 1914, to June 30, 1915: American, 167,000 tons; foreign, 12,358 tons; tonnage not registered, 292,286.

The commissioners acted favorably upon the following:

Directing superintendent of streets to extend time for the Howard & Elgin street company to improve Lockwood street.

Directing superintendent of streets to extend time for Hutchinson company to improve Peralta street between East Franklin and Franklin boulevard.

Directing superintendent of streets to extend time for Hutchinson company to improve Peralta avenue from Hopkins street to 40th street northeast of the north end of Madeline street.

Authorizing the city specifications for paving portions of Bay street, Vale Avenue and Peralta avenue, and recommending passage of resolution of incorporation and encratification for a portion of Peralta street from Thirteenth Avenue to Persimmon street, and recommending passage of resolution of incorporation for same.

Authorizing time for improvement of Sixteenth Avenue from East Fourteenth street to Smith street to P. Mathiessen.

Authorizing time for improvement of Main street to the beach without the main

portion of the street.

"That is a hum diagram you have there," Miller said with a laugh.

"Your ship is built on a straight line and not curved. You better get another engineer."

"I think that's the flippancy," Baccus answered.

"I think that a 400-foot ship can't go there without the main

portion of the deck being from 25 to 30 feet, and from the wall," continued Miller.

"Don't you believe it?" Baccus retorted. "I am taking notes."

"Well, I am in favor of Mr. Miller's appointment," Mr. Jackson said. "For the time I sent him, if appointed, to be assigned to the immediate investigation of that nuisance we have in West Oakland. I mean that I will see that at the map of the San Francisco quaywall. That's got a dozen angles in it. They have no cause of complaint there. You are entirely wrong, Mr. Baccus."

At this point Miller took his map to Mayor Davis and explained the San Francisco waterfront to him. The two-pointed argument was occasioned by the statement of Baccus that Miller was one of the most responsible for the placing of angles in West Oakland.

"I think that's the flippancy," Baccus answered.

"I think that's the flippancy," Miller said with a laugh.

"It seems that Mr. Baccus' charges

RAILWAY BATTLE ARGUMENTS HEARD

Action Between United Roads and S. F. Shifted to the Supreme Court.

SAN FRANCISCO, July 27.—The second battle between the United Railroads and its subsidiary, the Sutter-street Railway Company, and the city and county of San Francisco, was referred to the superior court today when arguments were heard in connection with the alternative writ of prohibition granted by the court last Thursday. The railroad companies seek to restrain Pending Judge James T. Trout and all the departments of the superior court from interfering further in their litigation with the city in connection with the joint operation of the outer Market-street tracks. At present a writ of execution granted by Judge Trout, preventing the operation of the outer tracks, remains intact this morning with the entire outer street, and with Attorneys William M. Cannon and William M. Abbott, representing the United Railroads, and Special Counsel Matt L. Sullivan and City Attorney L. H. Clay.

Attorney Lull appearing for the municipality, the case was argued at great length. Not only were a number of city commissioners and members of the city council members of the bar were on hand to witness the legal skirmish. Attorney Cannon opened the argument in behalf of the United Railroads and the Sutter-street railroad company. He argued that one department of the superior court had no right to nullify the action of another, and that Judge Trout's injunction should have remained in effect. He held that a stay could be granted only in connection with an appeal from Judge Trout's ruling.

"Twenty days have now passed and no such appeal has been taken," he declared. "For all we know there may never be an appeal. The mayor has made a statement that the city would appeal but if they are allowed to have their stay and if this court should sanction the action of Judge Trout there is likelihood that there will never be an appeal. Meanwhile we are daily witnessing 700 transactions on the property of these companies."

Cannon cited at length the various provisions of the outer street and the decisions bearing on the granting of temporary injunction.

65 PERSONS KILLED ON CROSSINGS IN YEAR

SAN FRANCISCO, July 27.—The Railroad Commission this morning in denying an application for a grade crossing over the tracks of the Southern Pacific Company, gave first and second reading to an ordinance appropriating \$25,000 to complete the outer street, and in connection with the placement of angles in the wall in condition to handle a big cargo from the Hawaiian Islands to arrive here the middle of August.

Plans and specifications were adopted for paving and flooring behind the quay wall and around the new warehouse and bids were called for.

"No," said Miller, "the curved lines of a ship would cause it to fit in. As a matter of fact, it could be moored in better advantage on account of these angles."

"I am sure," said Baccus, "I want to have a public hearing on the temporary injunction.

Plants and specifications were adopted for paving and flooring behind the quay wall and around the new warehouse and bids were called for.

REPEAL THE SEAMAN'S BILL!

If not repealed in the meantime the La Follette seaman's law, enacted at the last session of Congress, will go into effect on November 4, 1918, a little more than three months hence. This so-called "act to promote the welfare of American seamen in the merchant marine of the United States" is one of the most unfortunate and harmful pieces of legislation which Congress has passed within the last fifteen years.

If it is permitted to become effective the fate of the American merchant marine is sealed. The mischief it will have done will be difficult and costly to repair. It is not likely that on November 4th next there will be a vessel under American register engaged in trans-oceanic merchant business. On the Pacific Coast the Dollar Steamship Company already has sold two of its steamers and the Pacific Mail is arranging the details for the sale of its fleet of excellent ships. American owners operating on the Atlantic Coast are preparing to do the same thing. Here are some statements by steamship owners:

AMERICA AND EUROPE.
Thoughtful Americans cannot help being affected by the change in the military situation that has taken place in Europe within the last two weeks. The German and Austrian forces are conducting a gigantic campaign in Russia and Poland. Two great armies, under the command of two able and intrepid generals, von Hindenberg and von Mackensen, are bending the ends of a thousand-mile line around Warsaw, Russian stronghold. The fall of Warsaw appears to be only a matter of days, and with it the Russian army may be crushed. Even should the Russian forces escape it ought to be no difficult task for the Austro-German forces to straighten and strengthen their line, throw up fortifications and hold the Russians back with a comparatively small force.

If this plan succeeds in the East the Teutonic allies may transfer their forces to the western front in sufficient numbers to inflict a crushing defeat upon France. It may come to pass that upon the ruins of the French Republic the outposts of the German empire may be erected.

Is there any doubt that the establishment of a dominating military empire in Central Europe would be a grave menace to this republic? Is it not becoming clearer that this republic was permitted to work out its destinies unhampered because a certain balance of power had to be maintained in Europe?

If the armed nations of Europe cannot stop the German legions, what might happen if Germany should turn upon America? Before such a conqueror we might find that we had already become "Chinified." We have seen enough already to be assured that the elusion, exhortation, persuasion, disingenuousness and sophism of the salary-universal peace" propagandist would avail nothing.

MR. DANIELS' LOOSE TALK.

Here is another thoughtless remark by Secretary Daniels. "I believe," he says, referring to his plan for an advisory board of civilian scientists for the navy, "that when this board has been selected and has got down to work we will presently be in a state of defense such as no other nation has ever seen." It would be unfortunate indeed if the people generally possessed as little knowledge as the statements of Mr. Daniels indicate him to have; unfortunate if the country should be lulled by his enthusiasm into supposing that we shall "presently" be defensively strong beyond comparison when and because the Edison board has got down to work. The recommendations of this board will have to encounter the watchdogs of the treasury, the extreme pacifists, the views of Washington bureau chiefs, the worshippers of tradition in and out of the service. The road to changes and innovations will be traversed slowly and only with great patience, labor and sacrifice. The people must not get the idea from Mr. Daniels' thoughtless remark that security is in sight. It is sincerely hoped that the country will have occasion to be truly grateful to the Advisory Board of Civilian Scientists, but it will require more than this board's recommendations to make even a beginning toward real preparedness.

AN EXPERIMENT.
Secretary Daniels' action in inviting a number of prominent inventors and men of science to form an advisory board to confer with naval officers has much to commend it. This idea was borrowed from Great Britain, where a fortnight or more ago an "Inventions Board," composed of distinguished scientists was formed for the purpose of co-operating with the Navy. Secretary Daniels' plan, of course, is wholly an experiment and it may or may not be productive of real benefit to the service. They have a saying in the Navy Department that a "board" is long, thin and wooden; meaning that committees or bodies of the sort which Mr. Daniels has in mind often talk a long time, reach rather thin results and show a disposition to be stiff and unyielding in their opinions.

Secretary Daniels' board of inventors cannot be expected immediately to contribute a very great deal to the efficiency and preparedness of the Navy. Its members are not naval experts; they are not scientific experts; they are not experts in how to do big things. They may be very useful if they will, say, give time and attention and effort to the work of helping the navy. They may be able to devise some new invention of value and they can at least pass intelligently and with open minds and a liberal spirit upon the many inventions and processes which are monthly communicated in considerable numbers both to the experts of the War and Navy departments. Many admirable devices, applicable in one way or another to the mechanism of warfare, have been invented and offered to the United States Government and have been in many instances rudely refused by the officials who were too indifferent or too lazy to make a proper examination of them or because of jealousy which caused them to think that no invention of eminence should ever get out unless it came from the Bureau itself.

To those who like to have the peace services opened by singing "I didn't raise my boy to be a soldier," we should like to say that we have heard that during the civil war many a mere man was prodded into a patriot by the women at home and driven off to the war. This suggests that ideas about armaments and preparedness are fixed by mental processes and not by sex. There is every reason to believe that the educated woman and the woman voter

is just as patriotic as the women of earlier days.

THE VIEWS OF CARDINAL GIBBONS

Cardinal Gibbons, eminent and beloved Catholic divine, upon the celebration of his eighty-first birthday, gave to the newspaper a brief statement of his views on national and international affairs. He touched upon four important subjects, saying:

"A year ago President Wilson did me the honor to send me his eight-hour bill, which he had sent to Congress and which expresses the opinion that neither Capital nor City of Washington is capable of reeling the influence of the motives of international and they would not heed the President's message. That has justified my opinion.

"I am still deeply interested in our attitude toward the Central Powers, and the news we receive further I had just received from Europe. But a month previously I had seen

talks with King Albert of Belgium and his consort, which did not give the world dreams what a change would be in a few months. Had Belgium acquiesced to the demand of Germany and permitted the passage of her

army, they would have marched straight to Calais and

then to Paris, and the Allies should have resorted fourfold for what

he has sacrificed.

We do not want a strong standing army and we do not

need it. A well-trained militia, and our coasts properly

and fully fortified and garrisoned, is what we need.

I am still deeply interested in our attitude toward the

Central Powers, and the news we have not undergone

change. I am glad that there seems to be no disposition

on our part to give them speedy independence. Allow them to be self-governing and it means the rising up of

them until that far-off future day when they shall be

ready for independence.

The Americanism and patriotism of Cardinal Gibbons

always has been strengthening and edifying. This venerable prelate has kept in touch with the affairs of the world and has been a clear thinker. His spiritual vision has always been centered on the advancement and preservation of the American nation and American ideals as meaning the greatest service to the advancement of the civilization and Christian character of the world.

He sympathizes with ravaged Belgium; he rejoices

that Germany was not allowed to dictate terms to the

world; he disapproves our Mexican policy as being fruitless and considers the pledge of the Democratic party to

give the Filipinos independence unwise and premature. He urges a well-trained militia and that our coast lines be

properly and fully fortified and garrisoned.

Cardinal Gibbons is not influenced by political considera-

SENATOR BORAH.

A Character Sketch—His Life.

Collier is publishing sketches of the possible candidates for the Presidency. Concerning Senator Borah, it says:

"Borah's argument to the jury in the prosecution of William D. Haywood, secretary of the Western Federation of Miners, for the murder of former Governor Frank Steenberg of Idaho, lived up to the praises of those who lauded it in advance. It was a powerful scathing ram of law, logic and fact, and it compromised nowhere; but when he had finished Haywood's invalid wife, seated in her wheel chair, shook his hand and thanked him for his fairness.

I think that tells the Borah story as fully as six thousand words of copy. One can take that illustration for a gauge, and everything Borah has done in public life will fit it to the last notch. He is a progressive, but he isn't afraid to be seen in the company of reactionaries when they are behaving themselves, and he is a reactionary when his fellow progressives are inviting the attentions of the foul killer."

When Borah went to the Senate, the ruling powers decided, because of his prosecution of labor leaders, that Borah would be a good man to make chairman of the Committee on Education and Labor. To them labor meant violence, and they figured that Borah the Senator would be Borah the protector. As a result, probably to the amazement of those who did not understand him, Borah reported out the eight-hour bill for government contracts, the child labor bill, the bill creating the Department of Commerce and Labor, and making its head a cabinet officer, and they were passed. No labor bills were allowed to stumble in committee; they were reported out and voted up or voted down. There was something doing.

BORAH IS PROGRESSIVE—BUT NOT PROGRESSIVE

Senator Borah doesn't care anything about individuals as permanent factors of progress. The average life of a man is but thirty-three years, and he stands for things that he hopes will live longer than that. He has been an ardent Roosevelt supporter from the time he entered public life, and had charge of the Collier's contest drive the Republican National Committee in 1912. He likes Colonel Roosevelt immensely. He believes in him as a political factor. But Borah publicly declared that under no circumstances would he bolt; that he believed more could be accomplished within the party than by a split; that he was going to fight it out inside the party—nominate Roosevelt if he could, but stay within the party whether or no.

When he went home to his own state after that breach it was an up roar. Borah had been nominated for re-election to the Senate. One of the Republican candidates for the legislature informed Borah by letter that if he was not a Taft man he didn't propose to vote for him; another wrote that if Borah was not for Roosevelt he would vote against him.

"These men," said Borah in his opening campaign speech, "seem to be hunting for an intellectual slave. They seem anxious to bestow their votes upon the personal merits of some particular individual. They don't ask me whether I am a Republican or a third-party man; they don't ask me whether I believe in this policy or in that; they don't say 'Your record as a Senator has not been to the credit of your state, and therefore I must oppose you'; but they say: 'Unless you declare your allegiance to one or the other of these men, you must go down in defeat.' I reject their standards. I repudiate their test. If you ask me if I am a Republican, I answer yes, as I understand Republican doctrines. I am. If you ask me if I am a third-party man, I answer no. I have not joined the third party. I am a progressive, but I want to fight inside the Republican party. But inside or outside, I propose to urge the progressive measures for which I with others have stood."

At this meeting some one in the audience asked Borah if he thought Taft was honestly or honorably nominated for President at the Chicago convention. "I think seventy-eight delegates were seated for Taft that any fair tribunal would have given to Roosevelt," replied Borah, "and fifty-two delegates were seated for Taft that no honest tribunal could have denied Roosevelt."

As a result of that campaign Borah was re-elected to the Senate by the unanimous vote of the legislature.

THE CONSTITUTION.

He is a firm believer in the theory that practically everything that needs to be done in the way of bringing about a better condition of industrial and social affairs can be done under our present constitution and framework of government. He doesn't believe the first thing to do is to change the constitution; ever time something is wrong. He feels that the Constitution, much as it is, will stand the test of efficiency. It is a temple, not a circus tent to be moved after every performance. Its seasoned timbers withstand the deluge of civil war. Malefactors can be reached and legislators can remodel under the roof that has stood for so many generations.

Every monopoly can be throttled without changing the Constitution if we have the courage to do it.

Senator Borah has been for twenty years an advocate of woman suffrage. "Neither expediency nor a false view of her sphere will be able," he says, "to keep a woman from that council board where more and more are to be considered the interests of the child, the integrity of the home, the moral and physical well-being of the citizen; where more and more are to be discussed and determined all those movements which reach down and take hold of these things upon which her sympathy, her optimism are at least equal to her vision, and above all her influence.

There are great lawyers who never

make great statesmen. This is proof of that. Napoleon despised the man of parchment. Jackson laughed at him. The mere lawyer has no horizon. His nose is always to the grindstone.

He sees the relic, but fails to mirror the civilization that produced it.

Borah has vision. His transients

the past into the present, the present

into the future. Some one has said

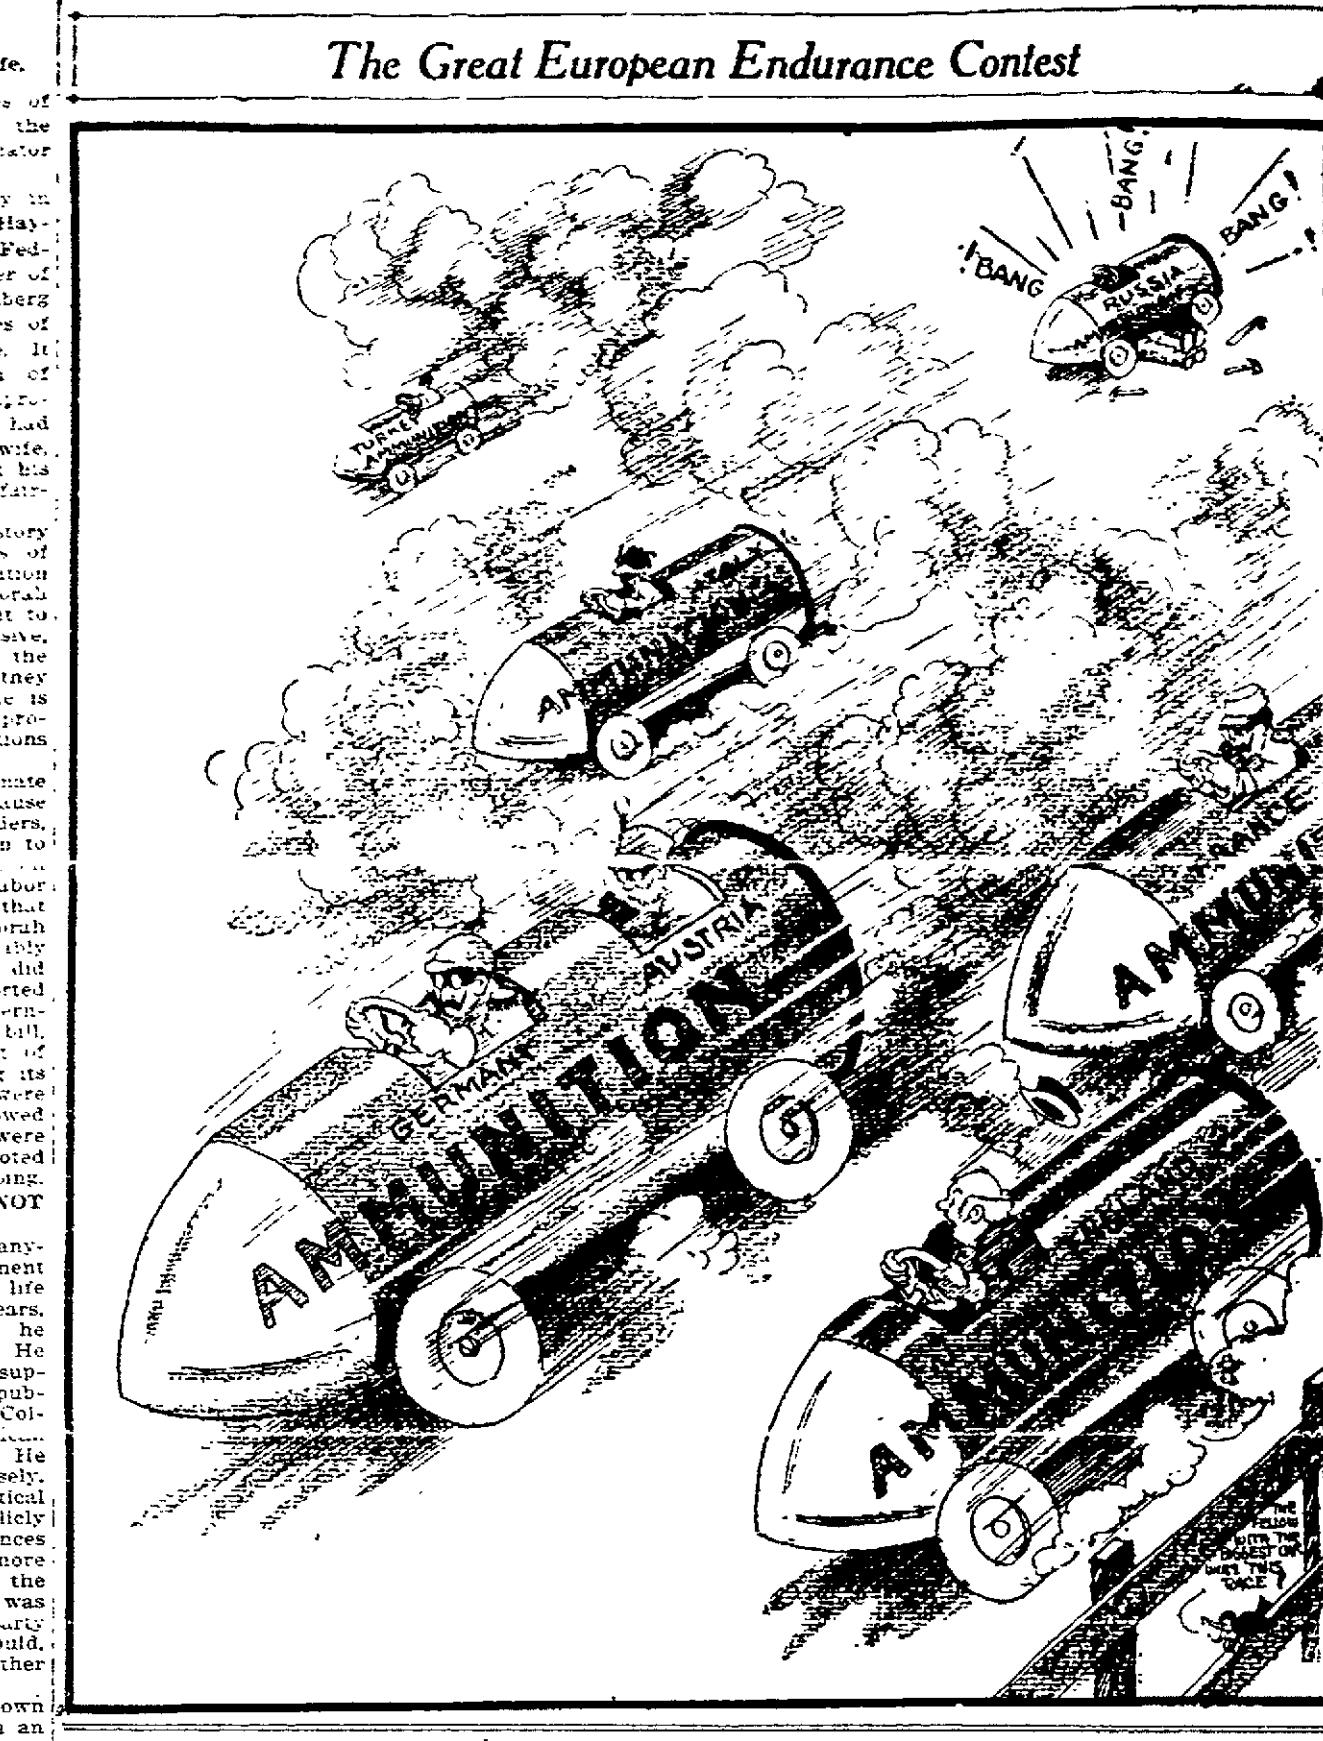

that the test of greatness is that a man shall look upon his own past and see it in the same light as that in

SOMETHING LOUD.

A Chinese battery will be soon in action at Modesto on Thursday and Friday when the Fresno Pops play the Modesto Merchants' Juniors. The Fresno team

consists of boys of not more than six years of age while the Modesto team is made up of boys who play on the Smith-Fink playground. The two Chinese players will represent Fresno.—Harford Sentinel.

See Oakland First.

Attracted by the unparalleled climate and agricultural advantages of Sonoma county, General Fernando Somosa, chairman of the reception committee of the Honduras commission at the exposition, has purchased 160 acres of land two miles south of Mark West Springs.

At the close of the exposition, he plans to come here and make his home, and will also bring several Central American families to live here in this section.—Santa Rosa Republican.

Birds of Passage.

Mrs. Peter Dorn, the bird fancier, who has an extensive aviary at 807 Seventh street, Hollister, has recently been the victim of some unscrupulous who caused the death of about 100 highly-bred peacocks, fancy doves, valley quail and Brazilian cardinals, by throwing phosphorus in the cages where the fowls are kept.—Salinas Index.

Nothing on Him.

Harry Lucas, fireman, repose quietly in a tub of cold water in Firemen's Hall early last evening when the fire siren sounded. Before the first alarm was in Lucas was on the running board of the auto truck just as the fire chief was getting the truck under headway.—Oroville Mercury.

Depends where.

A new question has been raised in Riverside. If a man gains permission to change his name and forgets to have his wife included in the change, is he still married? If so what is he to expect when he registers his family at a hotel as Mr. Jones, Mrs. Smith and family?—Riverside Enterprise.

WHAT IS DOING TODAY.

MAY STOP AUTO RACES AT FAIRS

Tomorrow's Exposition Program

Wednesday, July 28, 1915.

President Neyland Makes Request of State Board of Agriculture.

SACRAMENTO. July 27.—President John F. Neyland of the State Board of Control announced that the board had asked the State Board of Agriculture to permit no more motorcycle or automobile races on the track of the state fair grounds. The state means practically that there will be no such races on the state track and follows the recent killing there of Wm. Leiders, motorcycle.

BODY IS DISCOVERED: OLD TRAGEDY RECALLED

FRESNO. July 27.—A body believed to be that of Peter Marks, one of four persons who plunged to their death in an automobile while crossing a mountain bridge on March 25, 1914, was found yesterday at Hesperia by George Hope, a shoe dealer of Madera.

Instant Relief For Aching, Burning and Sweaty Feet; Corns, Calluses, Ingrown Toenails, Warts, Bunions, Sprains of Glands in Foot. Package 25c. at any drug store.

TODAY'S PROFITABLE.

STOCKTON. July 27.—San Joaquin county grape shippers are closing contracts for Tokays at \$25 a ton for August delivery, and \$18 a ton for September. A large number of growers are being governed by prevailing conditions throughout the nation, and are going to sign their contracts, as they feel that the general shortage throughout the country argues well for good prices this year for fruit. At the prices offered by the shippers the growers are assured of a fair profit on their product.

ORGANIZATIONS HOLD SPECIAL DAY AT FAIR

TRIBUNE BUREAU, Panama-Pacific Exposition. July 27.—The Independent Order of Foresters, the Christian church, the National Society of Royal Descendants and several other notable organizations held special days today at the Exposition, number of features of special interest marking the different ceremonies. Plans are being completed for the celebration of the 4th of July, to be observed on August 1, when the butchers of the United States will make merry and give away "hot dogs" to visitors. Troop H of the United States cavalry, which is to participate in the Carmel Mission pageant Saturday, arrived today and went into camp. Fred Bechtol, Grace McGowan Cook and several noted authors will be in the east.

John Smith will lead the grand march tomorrow night at the Zone Club ball. Argentina was honored yesterday at a luncheon at the Fairmount when the Argentine commissioners were honored by the Exposition directors. Vice-President M. H. de Young of the Exposition spoke on the South American republic's part in making the Exposition a success.

DR. STARR'S DESCENDANTS IN FAMILY REUNION

Descendants of Dr. Comfort Starr of England and Boston were present this afternoon at a gathering held in the Blue Room of the Massachusetts State House at the Panama-Pacific International Exposition. The numerous members of the Starr family were present in a body and the day was known as Starr family day at the Exposition.

Mrs. Nelle Starr-Hansen of this city and secretary of the Starr association, also George B. Starr of Los Angeles, chairman of the committee on arrangements, corresponded with all of the members of that family in California as well as with those in the east and the informal function proved to be a record-breaker for family gatherings. The afternoon was given over to music, poetry and addresses by the various members of the Starr family.

AGRICULTURAL PARK TO BAR AUTO RACING

SACRAMENTO. July 27.—John F. Neyland, chairman of the State Board of Control, announced yesterday that the Board of Control had agreed never again to rent the State Agricultural Park for either an auto or motorcycle speed meet.

Neyland declared that the track was constructed for horse racing and driving and not for motorcycles or automobiles;

that the track, being flat, courts accidents, such as happened at the last three racing meets.

May 2—Fred Farewell, motorcyclist, was killed.

June 2—Clarence King, autoist, lost his life.

Sunday, July 25.—W. A. Leiders was killed while traveling eighty-five miles an hour.

PERMIT IS ISSUED FOR REMOVAL OF TIMBER

WASHINGTON. July 27.—Permit to cut 35,000,000 feet of timber in the Chugach national forest, Alaska, for use in constructing the government's railroad in that territory, has been given the Alaskan engineering commission, the forest service announced today. The permit will be issued in conformity with an act of Congress of the last session.

The proposed cut of timber will be the largest amount ever taken from the Alaskan forests in one operation and is estimated to be worth about \$145,000.

WILL FORECLOSE IN DANBURY HATTERS' CASE

DANBURY. July 27.—A notice of intention to foreclose was filed here yesterday attorney for D. C. Lovett and Company against 133 defendants in what is generally known as the Danbury Hatters' case. The cases are returnable in Hartford on September 10. Of the individual defendants against whom demands for foreclosure are filed, 111 are proprietors in Danbury, 17 are owners of property in Bethel and 11 have property in Norwalk. United States marshals are expected to begin the service of papers upon each of the defendants today.

OFFICIAL IS RECOGNIZED. SACRAMENTO, July 27.—Recognition has been given California's new department of weights and measures by the appointment of Superintendent Charles G. Johnson as member of the committee on constitution and by-laws of the National Conference on Weights and Measures. Johnson's appointment is made by Dr. S. W. Stratton, United States Director of Research Bureaus, Washington.

SHERIFF'S ASSAULTANTS SHOT. RENO, Nev. July 27.—Two Mexicans, whose names are unknown, were shot and killed last night near Mono Lake, Cal., in a running fight with a posse of about 50 men, organized after the Mexicans had shot and seriously wounded Sheriff J. P. Dolan of Mono county, when he attempted to arrest them for setting fire to a number of buildings on the Silsena ranch, near Mono Lake.

OFFICERS PICKED AUTO ACCIDENTS BY FORESTERS CLAIM 3 LIVES

New Chief Ranger Applauded for Address Praising Several Courts.

Following an all delegates termed an enjoyable day's session in Oakland yesterday, the High Court of the independent Order of Foresters adjourned to San Francisco after hearing the following officers:

High court high chief ranger, J. D. Murphy; high chief ranger, A. W. Killam; assistant high chief ranger, E. Noland; high secretary, E. Cameron; high treasurer, J. E. Baigian; high physician, Dr. Brownlow; high counselor, F. J. Finch; high auditors, J. Nathan and E. Michaels; high journal secretary, F. X. Leleai; high marshal, E. J. Freeman; high conductor, E. Beard; high orator, Thomas M. Pettigrell; high messenger, J. Wells; superintendent of juvenile court, J. Gandy; senior Woodward, C. B. Schaeffer; senior woodward, S. H. Weston; senior beadle, J. Schwab; junior beadle, George W. Hascorn; supreme representative, William E. Stevens; C. W. Higley; S. Beambien and A. W. Puckett.

In an address to the delegates High Ranger Murphy praised them for the work of their respective courts, extolling the order in general and was roundly applauded. This evening the Oakland Foresters will join the delegates in San Francisco as guests of Court San Francisco No. 10, at a grand ball to be held in the California building, Exposition grounds. All delegates are enjoying a day at the fair today.

ORGANIZATIONS HOLD SPECIAL DAY AT FAIR

SACRAMENTO. July 27.—Bids were opened by the State Highway Commission here today for the construction of 37.4 miles of highway in five counties at a cost of not less than \$349,273.37.

Forty-four California firms bid for the job. The smallest job is for the construction of three-tenths of a mile in Colusa county through Arbuckle. The lowest bid was \$3778.25.

Nineteen different firms bid for the work in Marin county, four miles between Beldell and St. Vincent. R. B. Marshall of San Francisco was the lowest bidder, \$21,255.

Other lowest bids are:

Eleven and seven-tenths miles in Monterey county from Greenfield to Cambria, \$34,091; estimate, \$38,019.77.

In Santa Barbara county, eleven and four-tenths miles between Gaviota pass and Zaca station, \$34,586; estimate, \$42,158.45.

In San Luis Obispo county, ten miles between Atascadero and Paso Robles, \$37,893.45; estimate, \$47,179.40.

Contracts will be let this week.

REPORT DIRE DISTRESS IN MINING DISTRICT

By Associated Press. COLUMBUS, O. July 27.—Reports received here yesterday from militia officers who have charge of the distribution of food supplies among destitute families in the southern Ohio coal mining district prompted state officials to send out additional appeals for contributions in aid of the relief work.

The reports showed that a large number of 10,000 families in the Hocking and Sunday Creek valleys are dependent on outside aid for food. In describing conditions the word "pitiable" appeared frequently in the reports. There is no strike in these districts, but most of the miners are out of work owing to the shutting down of the mines.

ONE DEAD, ONE OVERCOME BY GAS ASPHYXIATION

SAN FRANCISCO. July 27.—George Serpa, who lives at 2419 Sutter street, was discovered unconscious in his room suffering from gas asphyxiation this morning. He was hurried to the Central Emergency Hospital, but was dead on arrival. The coroner is endeavoring to determine whether death was due to accident or design.

James Encolous, a laborer, of 80 Clara street, was overcome by gas this morning and was found in a dazed state. It is presumed that he retired without completely turning off the gas and only the fact that his window was open saved him from asphyxiating. He was taken to the Central Emergency Hospital and will recover.

PERSONAL

Miss Norris Pope is in Santa Cruz on a visit to friends.

Mrs. C. W. James is a visitor in Fowler spending a few days with friends and relatives.

Robert Hight is spending the summer vacation with his grandfather, George Allen on Price creek.

Miss Carlsen is spending her vacation at the home of her friend, Miss Mattie Henderling, in the Dry Creek area.

Misses Carlson and Weller of Pine Grove are visiting friends in the city.

The Misses Emma and Rose Gelin are guests of their brother and sister-in-law, Mr. and Mrs. Fred Gelin at Wilcox.

Albert and Anna Adams are in San Luis Obispo on a short visit.

Robert Causley and family and the Boart children are visiting at the Sherwood home.

Mrs. Edna Hawley is spending a few weeks in the Quartz valley, as the guest of her sister, Mrs. Stoops.

The Misses Somers are the guests of Mrs. M. Levy in Sutter Creek.

THE PRICE SHE PAYS

There is hardly an American woman nowadays who can keep pace with the demands made upon her time and energy without paying the penalty of ill health. It may be that headache, backache, dragging pains, headaches, nervousness or the tortures of a displacement. It is the price she pays. To women in this condition Lydia E. Pinkham's Vegetable Compound comes as a boon and blessing, a simple remedy made from roots and herbs which brings glorious health to suffering women.

THE TRIBUNE'S PAGE for WOMEN and the KIDDIES

Women in the News

SAN FRANCISCO, July 27.—Police have come to terms with Miss La Place v. Miss Carter and Neff of Oakland. See printed in the other day.

A prisoner escaped from the county and fled to the mountains, a search.

Policeman P. J. Smith, 30, wanted saw him riding a red pony and gave pursuit. Smith shot Captain, a horse familiar to the police department.

Copard escaped in a stolen auto and changed horses at the same time. The horse of the prisoner also stopped in a horse. The prisoner took to Suite for a short time.

Along came Captain James Kelly or his horse. He lent the animal to Smith, failed to find the prisoner. But a long search.

Smith finally came to the place where Miss La Place lived. There he learned that the man evidently the fugitive, had tried to steal a horse.

Miss La Place said the fugitive was riding around the stable where her horse was kept. She told him to go away. He refused and started to lead away the animal.

Miss La Place ran into the house, emerged with a rifle and took five shots. At the first shot he fled. She fired four of them over his head purposely. The last time she took deliberate aim and missed. The fugitive has not been captured.

WOMAN INJURED IN AUTOMOBILE CRASH.

SANTA ROSA, July 27.—Miss Monica McElroy of Cotati had her nose almost cut from her face and Mrs. Joseph Dent was badly injured in an auto collision on the state highway north of here. The Dent automobile was badly wrecked, as was the other car, belonging to J. Cody or Cotati. Blinding lights were responsible for the collision.

WOMAN HURLED OVER CLIFF, SAVED BY TREE.

ISLESBORO, Me., July 27.—An unidentified man married Mr. George W. Drexel of Philadelphia over a 40-foot cliff Saturday. She fell into a spruce tree projecting from the cliff. In midair, semi-conscious, she swung. Mrs. Drexel's means attracted men, who lifted her to safety. Her position had been perilous. Had she fallen she would have landed on rocks, many feet below.

Her assailant evidently a foreigner, escaped.

SOCIETY GIRL SWIMS ACROSS GREAT LAKE.

FRANKFORT, July 27.—Miss Daphne Van Wagner, a young society woman of this city, yesterday swam twice across Bass Lake at the Pines, a summer resort high up in the mountains. The distance is a half mile and it is the second time in the history of the resort that a woman has succeeded in swimming the lake.

FEARS FIANCÉE IS LOST ON EASTLAND; SAVED.

CHICAGO, July 27.—Miss Anita Smith of Bakersfield, Cal., was on her way to Chicago Sunday to marry Charles D. Manning, an employee of the Western Electric Co. At Milwaukee she

met with terror, of the Eastland tragedy and the drowning of Western Company employees.

But her fiance was saved and went to Milwaukee to meet her. He greeted her just as she had finished reading of the tragedy. They came to Chicago today.

KATE MASTERSON'S SANITY QUESTIONED.

NEW YORK, July 27.—Mrs. Kate Masterson, writer and playwright, was removed yesterday from the Hotel Brevort to Bellevue Hospital for a mental examination. Magistrate McArdle issued a warrant on application by her brothers. Mrs. Masterson, who is 45 years old, has been under the impression for several weeks that she was being followed by enemies.

MARIE TEMPEST IS AT LAST IN WEST.

SAN FRANCISCO, July 27.—After taking a convalescent circle around San Francisco, nearly 150 miles, a quarter of a century, Marie Tempest, lured by the Exposition, came to town last Friday and will leave this afternoon, which is somewhat sooner than she expected.

The English actress, who has been likened in her ripened art to Rejane, Jeanne Granier, and Duse, and who began her career as a comic opera prima donna, reached this city from Southern California, where for a brief period she was a member of the movie throng and was posed in her first movie picture.

Miss Tempest has never been in San Francisco before, though she has come as close to this city as Seattle and Portland.

AT CAMP AWAHNEE.

Mrs. George Wheaton and her sister, Miss Beete Palmer are spending several weeks at Camp Awaheee in the Yosemite but will return to Oakland about the first of August.

TO ATTEND NAVAL BALL.

Members of the navy set who live in Oakland and Berkeley are looking forward with pleasure to their navy ball to be given at the Hotel涉谷 on Saturday.

Entertainments for the visitors who have been at the St. Francis for the past fortnight was a garden party given by Mrs. Harry E. Walker, Saturday afternoon, when the guests were young people invited to meet Master Leon Walker. Mrs. Clinton Walker also gave a young people's party in honor of her nephew, entertaining at Pines Inn at the Exposition.

LUNCHEON AT THE FAIR.

Mr. Willis Walker of Minneapolis, who has been entertained by many Oakland friends during her stay at the St. Francis, gave a luncheon at the Massachusetts building at the Fair yesterday for a dozen guests. The luncheon was a success.

The moment might have been embarrassing except that a poet who have been at the St. Francis for the past fortnight was a garden party given by Mrs. Harry E. Walker, Saturday afternoon, when the guests were young people invited to meet Master Leon Walker. Mrs. Clinton Walker also gave a young people's party in honor of her nephew, entertaining at Pines Inn at the Exposition.

TWO WEDDINGS PLANNED.

Society is as much interested in the two weddings in the Du Val family, which will be events of the early fall. Miss Mae Du Val will be married first to Benjamin Clegg and, afterward, to her father, Mr. W. E. Du Val, will lead Mrs. Maeon Mathews to the altar. Miss Du Val, who is one of the beauties of society, will probably have a brilliant wedding with a church ceremony at St.

IN PORTLAND.

Miss Mary Eber, the sister of Mrs. Ephraim Dyer of Berkeley, is spending the summer as the guest of friends in Portland, where she is being delightedly entertained.

ENDS VISIT.

Miss Gladys Du Val returned to her several weeks with Mrs. Louis Manning at the latter's residence in Grand Avenue.

DINNER AT MCNEAR HOME.

Mr. and Mrs. John McNear will give a dinner on Thursday evening at their home in San Francisco. A dozen guests will accept their hospitality.

MISS HARRISON ENGAGED.

Announcement of the engagement of Miss Theresa Harrison to Andrew Warner Lawson Jr., son of Professor and Mrs. Lawson of Berkeley, came as a pleasant surprise to the city. The young couple, Miss Harrison, is the daughter of Mr. and Mrs. Harrison of San Francisco, and a sister of Mrs. McNear of Berkeley, and of Mrs. McNear of San Francisco. She is a popular member of the Gentry Club in Berkeley, where she spends much of her time with friends and relatives on this side of the bay. Mr. Lawson graduated at the University of California in 1913 and is

MASTER YOURSELF

LILLIAN RUSSELL

ways find the expected punishment.

There are but few reasonable eaters.

America produces every and all kinds of offerings in the way of food. Because we have all kinds of people and nationalities, there is a wide choice of selected food.

Some wise people say: "Stop eating while the food tastes good." Others say: "Leave the table while you are still hungry." I would say: "Eat simple foods, as perfectly cooked as you can get them. Avoid too many sweets and too many soups. Eat regularly and enough. Never linger at the table, picking at one thing or another. The stomach is very easily overloaded by that practice."

Avoid nuts while you are eating meat. They both have the same quality of nourishment.

Drink as little liquid as possible while eating, plenty of water between meals.

Remember that your stomach is small. It stretches with the quantity of food you put into it. There should be no sensation lower than the palate, which, alas! too often is not the case.

Eating late at night is most disastrous to good health. Why will people consume rabbits at bedtime and expect to sleep well? Hot cheese is indigestible at any time.

Food is the secret of health.

In one of those humorous plays at the old Weber & Field's, Hall, David Warfield had a line which he addressed to me which I have never forgotten, i. e. "Don't eat yourself sick 'cos you got it for nothing."

Temperance in eating is as important as temperance in drinking.

Many men and women are shooting themselves hoarse for local option and prohibition. At the same time they are practicing indifference at their own dinner tables.

Disciplining the appetite means eating the right foods in moderation.

Cravings of the appetite are strange sensations. They are caused by conditions.

When people crave sweets the system lacks saliva, as in the case of men who leave off smoking. Nothing seems to replace the lack of stimulation to the salivary glands but candy eating or gum chewing.

The craving for salty foods is caused by a lack of sufficient blood in the system. For instance, take the thin, anaemic schoolgirl with the pasty face. You will find she practically lives on pickles and other sour things.

The craving for salts is caused by too much salt in the system.

How many people will lie to themselves. They will make excuses to pacify a conscience which protests against indulgence in certain dishes.

Any suffering which follows the yielding to the plea of the undisciplined appetite is deserved.

How often we hear people say, "I know this doesn't agree with me, but I can't help it." They always

say this to me.

VERY WORRIED—Don't think of cutting the hair on your face. It will only multiply the growth alarmingly. There is no permanent cure for hair on the face but the electric needle.

BETTY—Cultivate the tints in your eyes and accentuate them in your color schemes. If your skin is clear as well as colorless, you may wear the pastel tints, but if the complexion is dark and colorless, the vivid shades are usually more becoming. Browns ought to harmonize excellently with your hair and eyes.

Answers to Queries

KATHLEEN—Massaging the busts gently night and morning with spirits of camphor will reduce them. Vigorous exercises, bringing in the arms, muscles of the arms and chest, will aid in ridding you of superfluous flesh. Try exercises with chest weights, rowing, swimming, boxing or fencing. They are all excellent, you will find.
